Training and Professional Development

Ventilation & Humidification

This short course aims to support staff who will be working with clients who are supported by mechanical ventilation. This session is classroom based, although we can also work in client`s own premises if required/agreed. The equipment utilised is for practical/demonstration purposes and there is practical elements included.

COURSE OBJECTIVES _____

- To review respiratory anatomy and function
- To be able to state the different modes of mechanical ventilation & humidification
- To have the opportunity to discuss the alarms and troubleshoot problems
- To be able to identify the range of equipment available to support ventilation
- To review accountabilities and responsibilities in the workplace
- To be able to identify when medical or equipment referral is required
- To improve staff`s confidence and to complete appropriate documentation

COURSE NOTES _____

- * This underpinning knowledge must be consolidated and assessed for competency within the workplace for each candidate to be compliant with organisational policies and procedures and the individual person-centred care plan and risk assessments
